IC 76-2437  
23 November 1976

25X1A

MEMORANDUM FOR:

Director of Performance Evaluation  
and Improvement

25X1A

FROM:

Chief, Production Assessment and  
Improvement Division

SUBJECT:

Community Workshop on Nuclear Proliferation

1. The workshop on nuclear proliferation intelligence convened by you and Howard Stoertz is scheduled to meet in the DDI Conference Room at 1:00 p.m., Monday, November 29. We expect representatives from the key Community organizations to attend, as listed in the Attachment. We have agreed with Stoertz and [redacted] that you will take the lead in steering the discussion.

25X1

2. I recommend that you steer the discussion in ways which will accomplish the following objectives:

- Ensure that all participants are aware of current and planned intelligence activities related to nuclear proliferation.
- Elicit views on the adequacy of:
  - Current and planned intelligence activities (collection, data base development, production of finished intelligence).
  - Current Intelligence Community organizations for supporting user needs in the area of nuclear proliferation.
  - User-Community communications, at both the staff level and the management-policy-maker level.

- Obtain consensus, where possible, on needed intelligence improvements, with specific organizations agreeing to take responsibility for necessary actions to effect improvements. The IC Staff and NIO/SP should follow up these agreements with appropriate papers to resolve disputes about new actions.

3. It will be difficult to do all this in one afternoon. I suggest the following general plan for the meeting, with a firm hand by the Chairman to keep things moving:

- 25X1A
- [redacted] open with a short statement about the purpose and plan for the meeting (following the thoughts in paras. 2 and 3).
- Stoertz follow with a statement about nuclear proliferation intelligence from the NIO perspective (he is prepared to do so).

- 25X1A
- [redacted] give a short briefing to set the stage for substantive discussions, using viewgraphs showing the following:
- List of users of proliferation intelligence.
  - List of Community organizations involved with proliferation intelligence.
  - Brief summary of the findings and recommendations of the Deutch Report.
  - Brief summary of the findings of the IC Staff review for the NSC.

- 25X1A
- [redacted] orchestrate a general discussion along the following lines (a slight modification of the agenda attached to the [redacted] Stoertz memorandum of November 11):

- User needs (e.g., background information on nulcear weapon development and production capabilities of various countries, analysis of incentives to acquire nuclear weapons, support on nuclear technology licensing issues).

- Review of activities of Community organizations. I suggest you call on each organization (see Attachment) to give a brief review of the functions of the organization, the priority accorded proliferation intelligence, current activities, and planned efforts. (Each organization has been asked to prepare 1-2 pages on these topics and submit them [redacted]. These inputs 25X1A will be distributed to participants before or at the meeting.) All will be interested in how the CIA/DDI reorganization will affect proliferation intelligence.
- Discussion of ways to improve proliferation intelligence. Some candidates include: a new DCI committee for proliferation intelligence; broader responsibilities for JAEIC, to include multidisciplinary team products; [redacted] 25X1 [redacted] improved data bases (e.g., world-wide plutonium holdings, expertise on nuclear weapons technology).
- Discussion of objectives and possible agenda items for a user-Community meeting in December or January.

4. I have asked [redacted] to take detailed notes and prepare a Memorandum for the Record summarizing the statements of the participants. Based on this meeting and other available information, I feel we should work with the NIO/SP to develop a catalog of intelligence organizations, activities and reports related to nuclear proliferation, as an input to the user-Community meeting which we plan to convene at a later date.
